

Dear Prospective Silverwood Family,

Thank you for considering Silverwood School where learning and imagination are fostered and where children are challenged and cherished. Two important benefits of independent education are the ability of the school to focus on its mission and the opportunity for each family to seek the program best suited to their child's needs and interests. Consider our mission, our program, and our community in relation to your child and your family. I hope you will take a few moments to explore our website, and stop by to see for yourself what Silverwood is all about.

Here are some important points about our philosophy and program to consider as you explore the possibilities a Silverwood education can provide for your child:

**ACADEMICS** – Small classes and low student-teacher ratios allow Silverwood School to provide an excellent, challenging, and engaging academic curriculum reinforced by individualized attention.

**CHARACTER** – Students learn generosity of spirit, respect and resiliency, integrity, and kindness of spirit through the promotion of these values in every class and every program.

**COMMUNITY** – Students practice the values and communication skills taught at Silverwood through our Character Development and Citizenship curriculum, school family program, and by learning to treat one another with respect so each student develops a sense of belonging, self-worth, and self-advocacy.

In this packet, you will find all the information and forms to apply to our school. However, the most important first step is a visit and tour of our campus to meet our students and teachers, and see for yourself what a difference Silverwood School can make.
